

Pesticide Action Network News, Winter 2011

In this first issue of the PAN newsletter, we highlight three campaigns that share a common focus: undoing corporate capture of government policy, science, food and farming. And we reinforce how important it is that together, we engage in actions, small to large, that democratize food and farming. This lighter-weight newsletter replaces our magazine, allowing us to communicate more frequently while conserving human and natural resources. Let us know what you think!
