

Media Center

Pesticide Action Network (PAN) North America works to replace hazardous pesticide use with ecologically sound and socially just alternatives. As one of five PAN Regional Centers worldwide, we link local and international consumer, labor, health, environment and agriculture groups into an international citizens' action network. This network challenges the global proliferation of pesticides, defends basic rights to health and environmental quality, and works to ensure the transition to a just and viable society.

Unraveling Corporate Spin Industry spin is going into high gear. But at PAN, we're keeping public conversation—and the facts—on point. Download PDF » [Read more](#)

[PAN Newsletter, Fall 2014](#)

On June 5, 2014, Pesticide Action Network Asia and the Pacific, partnering with PAN North America, launched a global campaign to phase out 20 highly hazardous pesticides particularly dangerous to children. The Terrible Twenty are linked to cancers, brain damage, birth defects and asthma, among others. The campaign will target policy makers in strategic Asian countries and North America with a call for a permanent moratorium on use of the Terrible Twenty... [Read more](#)

[PAN Newsletter, Spring 2014](#)

Finally, there's movement to strengthen U.S. rules—notoriously weak and difficult to enforce—that protect farmworkers and their families. Meanwhile, farmworkers, growers, retailers and allies are launching a ground-breaking initiative modeling how to work together to grow food safely, fairly and profitably. [A Generation in Jeopardy: How pesticides are undermining our children's health & intelligence](#)

Kids today are sicker than they were a generation ago, and a growing body of scientific evidence points to pesticides as a reason why. From childhood cancers to learning disabilities and asthma, a wide range of childhood diseases and disorders are on the rise. Download A Generation in Jeopardy, PAN's report reviewing dozens of recent scientific studies on the impacts of pesticides on children's health. If you'd like printed copies of the... [Read more](#)

[Pesticide Drift Monitoring in Minnesota](#)

This report presents the results of monitoring for airborne pesticides conducted between June 2006 and August 2009 in central Minnesota. Overall, the results of the study indicate that for several months each summer, central Minnesota residents in potato-growing areas are regularly exposed to low to moderate levels of the commonly used fungicide chlorothalonil in air. [Pesticides and Honey Bees: State of the Science](#)

Honey Bees and Pesticides: State of the Science, a 22-page report on the factors behind colony collapse disorder (CCD) with a sustained focus on the particular role of pesticides. The report documents evidence that pesticides are a key factor in explaining honey bee declines, both directly and in tandem with two leading co-factors, pathogens and poor nutrition. These studies, in U.S. and in Europe, have shown that small amounts of neonicotinoids—... [Read more](#)

[Bee the Change: Tips & Tools For Protecting Honey Bees](#)

Bees are in trouble. In the U.S., they've been dying off at alarming rates since 2006 and beekeepers continue to report staggering annual losses. While policymakers remain resolutely stuck — and have yet to take swift action to address the known causes of bee die-offs — home gardeners, backyard beekeepers and concerned individuals across the country have been stepping up to protect our favorite pollinators. View this toolkit for simple... [Read more](#)
