

90 Percent of Corn Seeds Are Coated With Bayer's Bee-Decimating Pesticide

I'm doing something very odd this week: speaking at the annual conference of [Croplife America](#), the main trade group for the US agrichemical industry. Croplife [members](#) include [Monsanto](#), [Dow](#), [Bayer](#), and [Syngenta](#), all massive multinational companies I write about regularly and witheringly. I am astonished that Croplife wants to hear what I have to say—what I think of the group's member companies and their products is a matter of public record—and am curious to hear what they have to say to me.
